Adapting To Your Environment

What makes us different?

- First product designed for micro businesses that rely on a single legacy landline. Currently no comparable products in terms of functionality and price point on the market

- Feature set based on research with 500 UK microbusinesses, based on business challenges and communication priorities

- Low opex service with high degree of customer self-service. Provisioned, deployed and managed online

- Feature-rich for a WLR replacement service. Supports all key features expected of a traditional telephone line including voicemail, call divert, call transfer and call hold, plus more features to make life easier for your customers
